FOR IMMEDIATE RELEASE

EASERA SYSTUNE INNOVATIVE SOFTWARE NOW SHIPPING

SysTune – Live Sound Measurement in Real Time

Foothill Ranch, CA – (December 2007): Now shipping from **Renkus-Heinz, Inc.**, **EASERA SysTune**, Live Sound Measurement Software. Developed by the AFMG Ahnert Feistel Media Group, the creators of **EASE** and **EASERA**, **SysTune** represents a remarkable step forward in its ability to take accurate acoustical measurements in real time even when an audience is present.

SysTune acquires Impulse Response data using live program material and simultaneously displays time-domain and frequency-domain measures in real time - and automatically produces accurate, repeatable measurements every time.

“**EASERA SysTune** is purpose-designed for real-time live-sound applications. It is a sophisticated yet simple to use software tool with novel, patent-pending features which are especially useful for system tuning and live sound measurements,” said Stefan Feistel of AFMG.

For more information, introductory pricing, and to download a FREE EASERA SysTune Demo Program or register for a FREE 30-day **EASERA SysTune** Trial visit www.renkus-heinz.com/easera/systune.html .

Headquartered in Foothill Ranch, California, **Renkus-Heinz, Inc.** is the worldwide leader in the design and manufacture of audio operations networks, digitally steerable arrays, powered and non-powered loudspeakers, system specific electronics and fully integrated Reference Point Array systems.
