A great point source loudspeaker array can deliver unbeatable sonic purity. In our new CF/CFX101LA Modular Point Source Array, we've updated the concept with our latest technologies to deliver a massive increase in efficiency over conventional cabinets, along with renowned Renkus-Heinz sound quality, plus amazing flexibility.

Its compact, sleek and affordable design is equally at home on the road or in a permanent installation. Flown, ground-stacked or multi-angle pole-mounted on the subwoofer, it's a groundbreaking solution for small and mid-sized venues. Add stacked or flown subwoofer arrays, a choice of non-powered or self-powered with RHAON networking, EASE Focus simulation and setup software, and you have a system of stunning versatility.

Call us for a demo at your nearest dealer and hear the advantage for yourself.
