

Can Your Loudspeakers Think Outside The Box?

RHAON

SG81-2R

Connect

Automated addressing, drag 'n' drop signal routing

Control

8-band fully parametric EQ, dynamics, delay & more

Supervise

Operator alerts via e-mail/text, fault logging, passwords

Signal in, sound out: loudspeakers were just black boxes until we developed RHAON. With one network connection; RHAON connects to 64 CobraNet channels plus control and monitoring data quickly and easily giving you Maximum Control of every networked loudspeaker.

Every powered loudspeaker we make is available with RHAON.
